## **Population 6 and 7 Notes**

1. Appeal Filed Date: If a state experiences delays in mailed appeals, it can use the received date rather than the postmark date to ensure that all appeals are counted. The received date can be used because there is no time lapse for these populations. This would help in those situations where appeals are received after the ETA 5130 report has been run for the previous month. For example, an appeal with a postmark of 3/31/02 that is received on 4/10/02, in a state where the ETA 5130 was run on 4/7/02, would be reported as having been filed in April rather than in March.
2. Subpopulations 6.2 and 7.2, Number of Claimants Involved in Multi-Claimant Appeal: States will either store an individual record for each claimant involved in the appeal or one record with the number of claimants. The software will count the number of records or add the number of claimants in Column 6 to derive the number of claimants involved in multi-claimant appeals filed.
